

Ezgi Doğruyol

Product Manager | Mobile Games | Live-Service & Monetization

Istanbul, Turkey | ezgidogruiol@gmail.com | +90 538 456 90 35 | linkedin.com/in/ezgidogruiol

PROFESSIONAL SUMMARY

Product manager with 6+ years in mobile gaming, with a foundation in live-service QA — including LiveOps events, in-game economy/monetization, and A/B experiment testing — that shaped a detail-driven, quality-first approach to product ownership. Led a B2B product from concept to content delivery in ~3 months with a 5-person team; instituted agile release planning where none existed; and built a QA team from the ground up, training three first-time QA hires into a functioning unit and taking part in hiring and performance decisions. That hands-on QA foundation now underpins a rigorous, detail-driven approach to product leadership — spanning stakeholder relationships and store compliance across iOS, Android, and alternative platforms, primarily across EU, US, and MENA markets.

CORE SKILLS

Product: End-to-end Product Ownership, Roadmap & Sprint Planning, Stakeholder Management, B2B Client Relationships, Feature Prioritization

Leadership: Team Building (grew a QA team from 3 first-time hires), Training & Mentoring, Hiring/Performance Feedback, Cross-functional Coordination

Publishing & Release: iOS/Android + Alternative Platform Store Management (incl. CrazyGames), Store Compliance & Admin, Agile Release Planning

Analytics & Attribution: Firebase, Google BigQuery, SQL, Amplitude, Mixpanel, AppsFlyer, Adjust, AppLovin

Live-Service QA: LiveOps Event & Economy/Monetization Testing, A/B Experiment QA, Test Scenario Design (incl. with Backend), API & Network-Level Testing (Postman, Charles Proxy)

QA Foundation: End-to-end QA Process Ownership, Functional/Regression/Exploratory Testing, Android/iOS Mobile Testing

Tools: Jira, Coralogix, Figma

KEY PRODUCT & LEADERSHIP HIGHLIGHTS

- Short & More (B2B Vertical Series):** Owned product end-to-end with a 5-person team — delivered ~30–40 localized pieces (incl. an AI dubbing workflow via HeyGen) in ~3 months as the client's sole point of contact.
- Desert Warrior (Mobile Action RPG, ~30-person team):** Introduced agile sprint/release planning from scratch, and built a QA function from the ground up — hiring and training 3 first-time testers into a working team.
- Zen Match (Live-Service QA):** ~2.5 years testing LiveOps events, economy/monetization, and A/B experiments on a live casual title (Good Job Games → Moon Active) — sustained a 99.6% average crash-free user rate.

PROFESSIONAL EXPERIENCE

Lumica — Remote, Freelance

Jun 2025 – Present

Freelance Product Consultant/Designer (part-time alongside Joygame through Feb 2026; primary focus since)

- Word Journey (Word Puzzle — live on the App Store): Designed the core "passport" progression mechanic, level design, and end-to-end UX; currently in testing.
- Word Solitaire (unreleased, started Aug 2026): Authored the GDD, UI design, and level design.

Joygame Publishing — Istanbul, Turkey

Aug 2024 – Feb 2026

Project Manager – Product Manager (Publishing, Production & Product — incl. JAI, Joygame's internal AI-driven project line)

- Owned the product process end-to-end for Short & More, a B2B vertical series — from planning and stakeholder alignment through development, design, creative production, and content delivery (~30–40 localized pieces, incl. an AI dubbing workflow via HeyGen) in ~3 months with a 5-person team.
- Managed the project's admin panel and served as the sole point of contact for the B2B client relationship; the engagement was paused after delivery due to B2B partnership terms.
- Managed publishing across iOS, Android, and alternative platforms (incl. CrazyGames) for the studio's hyper-casual portfolio; held admin access and sign-off authority across all store accounts.

- Led project planning and production coordination for Desert Warrior (~30-person team); introduced agile sprint and release planning processes where none had existed.
- Built a QA function from scratch for Desert Warrior — hired and trained 3 first-time QA testers into a working team, and took part in hiring and performance decisions as part of the studio's management organization.
- Worked primarily across EU, US, and MENA markets across mobile and hyper-casual game projects.

Moon Active — *Istanbul, Turkey*

Jan 2023 – May 2024

QA Engineer, Zen Match

- Joined Moon Active following Zen Match's acquisition; worked as part of a ~20-person international QA team across the company's global offices, on sprint-based QA tasks.
- Tested LiveOps events, in-game economy/monetization features, and A/B experiment variants, alongside functional, exploratory, regression, and cross-platform testing that helped sustain a 99.6% average crash-free user rate.
- Collaborated with teammates and stakeholders across countries, strengthening cross-cultural communication within a global product organization.
- Worked within Scrum teams using Jira and Postman for bug tracking, feature validation, and API testing.

Good Job Games — *Istanbul, Turkey*

Nov 2021 – Jan 2023

QA Specialist, Zen Match Studio

- Part of the early 2-person QA team on Zen Match Studio from its initial build stages; with close, end-to-end visibility into every release, owned QA across feature validation, regression stability, usability, and release readiness.
- Owned QA for LiveOps events, in-game economy/monetization features, and A/B experiment variants; designed test scenarios in collaboration with the backend team for live events.
- Used Charles Proxy for network/API-level inspection and Postman for backend API testing, alongside manual functional and regression testing.
- Worked closely within the product team on feature planning, issue prioritization, and quality feedback loops.

Azerion — *Istanbul, Turkey*

Jun 2020 – Nov 2021

QA Specialist

- Supported QA across a high volume of casual and hyper-casual mobile projects, including Habbo Hotel, within international teams.
- Owned test execution, Jira workflows, and release validation processes.

Vertigo Games — *Istanbul, Turkey*

Jun 2019 – Apr 2020

QA Tester

- First production experience, on Critical Strike (mobile FPS); tested gameplay quality, functionality, usability, and performance across production stages.
- Researched competitor mobile FPS titles to support feature planning and quality benchmarks.

INDEPENDENT PROJECTS

- Tiny Thinkys (to-do app, live), DayGlow (reminder app, in development), and Visa Ready (in development) — conceived, built, and shipped solo using no-code/AI tools, owning the full product lifecycle from concept to launch.
- Truewayist — Product Manager (paired with one developer) for the company's website (live) and a SaaS-level LMS platform (in development); own the roadmap and feature prioritization for both, currently unifying them under a shared login system.
